

Featured STRC Members

Stock & Trade Reference Certificate

HKin.com Stock & Trade Reference Certificate (STRC) is designed to verify supplier's in-stock status and trade references records.

Stock & Trade Reference Certificate

When it comes to dealing with overseas suppliers over the Internet, buyers exercise much precaution before confirming sales contracts. HKin.com has introduced Stock & Trade Reference Certificate (STRC) to facilitate and speed up the buying process. STRC is an indication of the trustworthiness and reliability of a supplier with in-stock inventories, based upon its verified records of certified business documents, credentials, previous and present business goodwill and status.

Benefits:

- STRC offers buyers the **confidence** & certainty of reliable purchases.
- STRC serves as a **pre-authorized credit check** to ensure suppliers have in-stock inventories and positive trade references.
- STRC tag is conspicuously displayed in search result pages for **instant identification**.
- STRC enables buyers directly contact sifted supplier with **in-stock** and credibility.
